Summary

Java Backend Developer with 3.5+ years building high-availability microservices and distributed systems at enterprise scale. Currently shipping cloud-native services on the AT&T account at Accenture. Skill Star Award · Accenture 2024.

Experience

Accenture — Java Developer (Client: AT&T) · Dec 2022 — Present

- Designed and deployed 5+ cloud-native microservices using Spring Boot, Docker, and Kubernetes across distributed AT&T production environments.
- Eliminated duplicate request handling and reduced peak-load processing delays by ~40% by architecting an async API pipeline with Executor Framework and transactional DB queue locking.
- Diagnosed and resolved 20+ data inconsistency and timeout bugs across REST (JAX-RS) and SOAP (JAX-WS) interfaces.
- Led end-to-end RCA, bug resolution, and regression testing — cutting repeat issue rates across the platform.
- Validated a large-scale Oracle DB migration from on-prem to cloud via API, stress, and load testing.
- Drove remediation of 100+ SAST/SCA/DAST vulnerabilities, achieving compliance targets.
- Led peer code reviews and mentored junior developers on clean code and scalability.

Project — LuxeLine (E-commerce REST API)

- JWT-based auth with role-based access control for customer & admin flows.
- Normalized MySQL schema with Spring Data JPA + Hibernate ORM optimization.
- Spring Validation, Lombok, ModelMapper — 30%+ less boilerplate.
- Centralized exception handling with meaningful HTTP error responses.
- Swagger UI documentation; deployed on AWS EC2.

Skills

Languages: Java

Frameworks: Spring Boot 3, Spring MVC, Spring Security, Spring Data JPA, Hibernate

Databases: Oracle SQL, MySQL, PL/SQL

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, Maven, Git

Security: JWT, OAuth 2.0, SAST, SCA, DAST

Tools: IntelliJ, Postman, Bruno, Swagger, Log4j

Education

B.E. Electronics & Communications — Institute of Aeronautical Engineering · 8.42 CGPA · 2022
